

## In the previous sessions

Teachable machine -- Create any ml model to classify images

Poe, Bing AI, ChatGPT -- create a poe bot with specific instructions or just upload the prompt you used in docs file.

Lexica, Firefly, Leonardo AI, Tensor art --- create your own art images  
create a story for kids, QR code art

Creating animations with AI -- D-ID , Google Colab project, Adobe animate  
Clone any voice with AI ---> Discord servers, RVC Cloning

## Next Week is the final deadline for all projects

# AI Automation Systems

---

## Session 6

# What Does Automation means

---

It is the automatic doing of repetitive routine tasks, to save time and efforts.

## Examples

Automatic replying on emails, or  
collecting it into sheets

Auto reply on facebook  
Auto post in groups

Automatically send messages on  
WhatsAPP

# What Does Automation means

---

Automation system is the glue that connects multiple apps together to achieve one larger task.

**Example:** Using ChatGPT to summarize your mail, and then record it in a google sheet

In unity lies strength

IF this Happened, Do that...

# How can benefit from automation systems?

---

## Personal side

Save your time

Doing more tasks

Stable Quality

## AI Automation Agency

Selling a specific workflow  
multiple times

Get Easy profit and be hired for  
small and medium businesses

Scalable business  
enlarges with your clients

## How to start Automation with no coding

---

- Famous great tool used for automation
- Highly limited and required subscription
- Doesn;t support more than two steps automation in its free version

- Offers very easy GUI to automate and link applications together.
- Have sufficient options in its free version

# How to start Automation with no coding

---

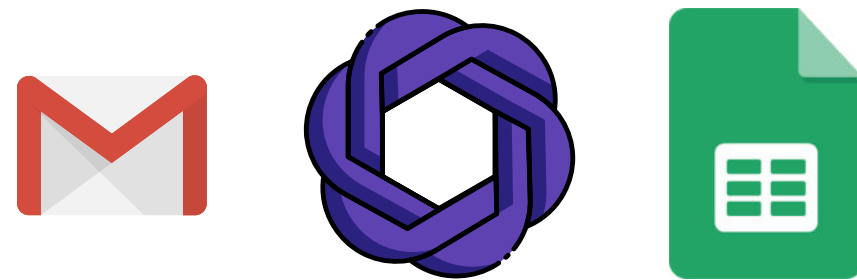

Let's Create an account on Pabbly!

# What Will we Build today?

---

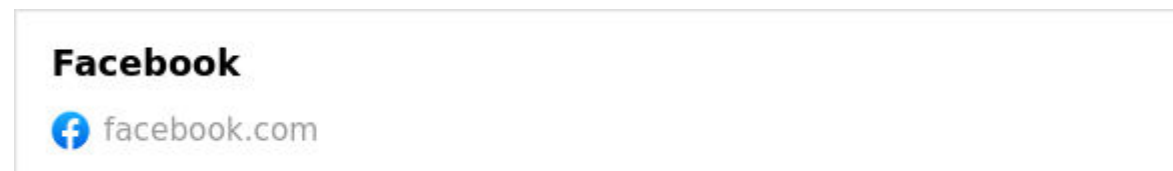

Automated summarizing  
mails workflow

Automatic sending mails for  
any response in google  
forms with attachement

Automatic system for posting  
on social media

## Important Terms we should know first before we start

---

The main idea of automation lies in this sentence

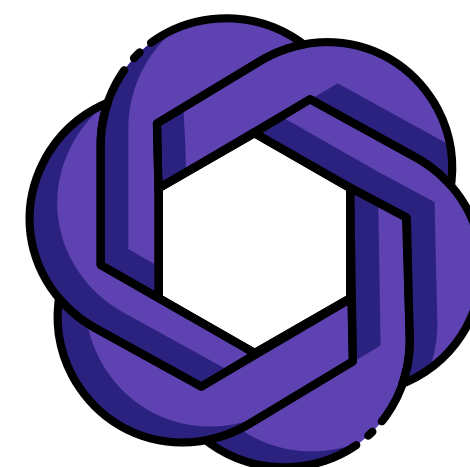

Received a mail  
Someone Commented on the post  
Today = certain day

Summarize it with ChatGPT, Then sends it to sheet  
Send This automatic reply  
Post this image on a facebook group

**Unlimited possibilities and apps to connect**

# 1- Auto summarize your Gmail and send it to Google Sheets

# Creating an account on ChatGPT

## 2- Automatically respond on emails registered in google forms

## 3- Automate facebook posting with AI

**Facebook**

 facebook.com

**Where to get known more  
on other connections and  
how to make them?**

**Pabbly + the apps**

## Session Project:

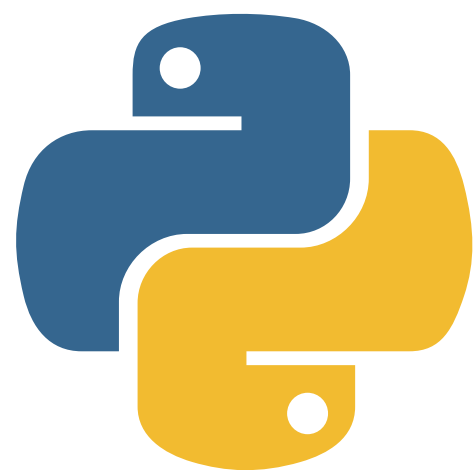

Make any automation system between any app you choose.

Get inspiration from youtube or try to redo sessions projects if it interests you.

## In the Next Session...

Full python fundamentals for coding  
your own AI automation tools

**Any Questions??**
